

Robotics Summer Camp

Course Summary

The Robotics Club will guide the student through the exciting world of robots. The student will define what a robot is (and what it isn't!), study the myths that surround robots, examine how robots are used in movies and stories, and consider how robots assist humans. Experts in the field of robotics will help the student learn more about artificial intelligence and what the future holds for humans and machines.

Course Directions and Tips

The student will receive information from their summer school teacher about LiveLesson Sessions, message board posting and required assignments during the first day of summer school.

1. Robotics

1. What Is a Robot?
2. History of Robots
3. Robots in Popular Culture
4. Commercial Uses
5. Government Uses
6. Form Follows Function
7. Artificial Intelligence

Now it is time for you to practice building and programming a robot on your own. Click on the link below to watch the Robotics Club Teachlet® tutorial.
